

MS0835W(CE)-UFB ULTRA FINE BUBBLE

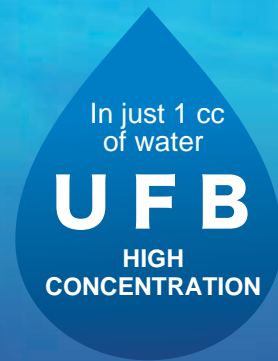

UFB ULTRA PUMP

Billions of concentrated UFB in an instant!

MARUYAMA
ULTRA FINE BUBBLE
UFB

UFB ULTRA FINE BUBBLE

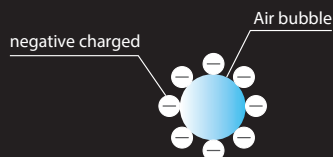

The UFB Ultra Pump can generate hundreds of millions of ultra-high concentrations of UFB in just 1 cc of water.

Ultra Fine Bubble (UFB) is an invisible small bubble. Japan is the leading the world with this revolutionary technology. Together with this technology, MARUYAMA has developed its own 'UFB' specialized pump.

UFB Features

The UFB Ultra Pump instantly generates high-concentration UFB, and can be used without the need for long-time circulation operation as

- High Cleaning effect performance
- Physically destroys bacteria and viruses
- Penetrates even the smallest and deepest cracks
- Bio activation of living things
- Various gases contained by bubbles

Specifications

| | |
|--------------------------|---------------------------------------|
| Model | MS0835W(CE)-UFB |
| Dimensions (mm) | 395X425X635 |
| Dry Weight (kg) | 8.6 |
| Chemical Tank(L) | 25 |
| Power (cc) | EE263 26 2cycle E/G |
| Water Absorption (L/min) | 5.0 |
| Pressure (Mpa) | 3 |
| Quantity UFB/min | 750 billion |
| Accessories | Hose, Ball-cock, Pipe, 2 head nozzles |
