ULTRA FINE BUBBLE

UFB ULTRA PUMP

Billions of concentrated UFB in an instant!

Standard Accessories for UP0220BW

MARUYAMA

ULTRA FINE BUBBLE
UFB

UFB ULTRA FINE BUBBLE

In just 1 cc
of water

UFB
HIGH
CONCENTRATION

The UFB Ultra Pump can generate hundreds of millions of ultra-high concentrations of UFB in just 1 cc of water.

Ultra Fine Bubble (UFB) is an invisible small bubble.
Japan is the leading the world with this revolutionary technology.
Together with this technology, MARUYAMA has developed its own 'UFB' specialized pump.

UFB Features

The UFB Ultra Pump instantly generates high-concentration UFB, and can be used without the need for long-time circulation operation as

- High Cleaning effect performance
- Physically destroys bacteria and viruses
- Penetrates even the smallest and deepest cracks
- Bio activation of living things
- Various gases contained by bubbles

Specifications

Model	UP0220BW
Dimensions (mm)	290 X360X455
Dry Weight (kg)	5.9
Chemical Tank(L)	10
Power (V)	18
Water Absorption (L/min)	1.4
Pressure (Mpa)	2
Quantity UFB/min	406 billion
Accessories	Hose, Lever-cock, Flexible nozzle
