

UFB ULTRA PUMP

Billions of concentrated UFB in an instant!

UFB ULTRA PUMP

In just 1 cc
of water

UFB
HIGH
CONCENTRATION

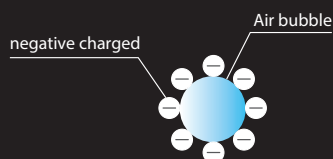

The UFB Ultra Pump can generate hundreds of millions of ultra-high concentrations of UFB in just 1 cc of water.

Ultra Fine Bubble (UFB) is an invisible small bubble. Japan is the leading the world with this revolutionary technology. Together with this technology, MARUYAMA has developed its own 'UFB' specialized pump.

UFB Features

The UFB Ultra Pump instantly generates high-concentration UFB, and can be used without the need for long-time circulation operation as

- High Cleaning effect performance
- Physically destroys bacteria and viruses
- Penetrates even the smallest and deepest cracks
- Bio activation of living things
- Various gases contained by bubbles

Specifications

Model	UP400
Dimensions (mm)	443×242×361
Dry Weight (kg)	11.0
Power(kW)	2.2
Water Absorption (L/min) at 1100 rpm	32
Pressure (Mpa)	3
Quantity UFB/min	8 trillion
Accessories	Suction Hose Water Discharge Hose Suction Strainer Assy V-Pulley
